Success consecrates the foulest crimes.—Seneca.
A fellow-feeling makes us wondrous kind.—Garriek.
Man is the only animal that can talk and the only one that wastes speech telling about himself.

WHEN THE SCHOOLBELL RINGS.

Leonard Randolph.
When the schoolbell rings on the opening day,
When it calls the boys and the girls from play,
And they get their books and march along
To its ding, dong ding! and its ding, dong, dong!
What a sad sweet song does the old bell sing,
With its ding, dong, ding! and its ding, dong, ding!
Yet, we must not shirk and we must not shrink
From its stern tinkle, ling, and its cruel tinkle, link!
But we hop and skip and we laugh and sing
To its jolly tinkle, link! and its merry tinkle, ling!

When the school bell taps on the closing day,
And the boys and girls scamper back to play,
O, the endless fun its tap foretells!
They could almost dance to the sound of the bell!
What a sad sweet joy on a closing day,
At the last soft tap, just to steal away
From restraint and rule, from the chart and book
To the woods and fields, to the wind-
ing brook,
For a full three months, even more perhaps,
Who knows, who cares, when the schoolbell taps!

When the schoolbell rings with its ding, dong, ding!
To its ding, dong, dong! fond memories cling;
And I scarce can work, I can only think
Of its soft tinkle, ling! and its sweet tinkle, link!
'Twere a sad sweet joy once again to sing
To its jolly tinkle, link! and its merry tinkle, ling!
Who tires of the ways of grown up men?
Who wishes that he were a boy again,
For a month or a day, just an hour perhaps?
(We know, who sigh, when the schoolbell taps!)

The Beagle a Rabbit Dog.

The beagle is the rabbit dog. He is best adapted by size, pace, nose and tongue for this work. Large hounds, or even those of the harrier type, cannot do the work so well and are more at a loss on quick turns and doublings, to say nothing of their seeming something radically wrong in pursuing bunny with dogs adapted to larger and stronger game. The beagle and the rabbit were made one for the other, and properly done, there is no better day to be had afield than one with a good pack of these little dogs. It is a pack you must have. One dog or two or three are not the same thing at all. Take seven or eight of the little fellows, well matched, and go afield on foot and get your game. Then Molly Cottontail will take on a new value in your eyes. To see a pack once, running swiftly, lunging merrily, picking up the turns, at a loss for a moment, scattering, catching the trail, packing again on the re-discovered scent and finally running their game to the death in the open, will convert you, first into a beagle lover, and second, into an advocate of hard condition in the field.—Todd Russell in The Outing Magazine for February. So. 3-100.

Don't brag to your competitors about how good your goods are and how you are selling. Let them think your business is bad and your goods are bad, if it pleases them. They may lose sight of you when you are "sawing wood."

When you've got every man in your employ grounded in the belief that you are dealing fairly with him, you've got an organization that will bring success for your plans—if they are good plans—and you can go away safe in the knowledge that nothing will go wrong.

GOOD CHANGE
Coffee to Postum.

The large army of persons who have "found relief from many chronic ailments by changing from coffee to Postum as a daily beverage, is growing each day.

It is only a simple question of trying it for oneself in order to know the joy of returning health as realized by an ill, young lady. She writes:
"I had been a coffee drinker nearly all my life and it affected my stomach—caused insomnia, and I was seldom without a headache. I had heard about Postum and how beneficial it was, so concluded to quit coffee and try it.
"I was delighted with the change. I can now sleep well and seldom ever have headaches. My stomach has gotten strong, and I can eat without suffering afterwards. I think my whole system greatly benefited by Postum.
"My brother also suffered from stomach trouble while he drank coffee, but now, since using Postum he feels so much better he would not go back to coffee for anything."
Name given by Postum Co., Battle Creek, Mich. Read, "The Road to Wellville," in pgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

PRACTICAL ADVICE ABOUT
DIVERSIFIED FARMING

Cotton Cultivation.

With rich soil more space will be required between the rows; with thinner soil, less.

The general rule for spacing rows is that the distance between the rows shall be a little more than the height of the cotton on the land in average years. Where cotton usually grows two or three feet high the rows should be from three and one-half to four feet apart. Where cotton normally grows about three and one-half feet high in rows four feet apart. Where it grows four or five feet high, put the rows five feet apart. It is better to have the spaces between the rows a little too wide than too narrow. Air and sunlight are of the greatest importance in pushing the crop to maturity.

On very fertile and strong lands there should be a good distance between the cotton rows, but the plants may be slightly crowded in the rows with good results.

Plant early-maturing varieties of cotton. Some large-boll varieties are even better than the small-boll cottons under weevil conditions because of a thicker calyx, and consequently the half-grown bolls are less likely to be punctured by the weevil.

If fertilizers are used, the following general rule should govern: On rich lands use mainly fertilizers that will stimulate the fruit and not the stalk growth. On lighter lands use more of the elements to force growth, combined with others which will mature the fruit.

High-grade fourteen per cent. acid phosphate may be considered a basis for increasing fruit and hastening maturity of crops. Even on the richest land it has been demonstrated that a small percentage of nitrogen added to the acid phosphate gives better results. Mix three parts of acid phosphate and one part of cottonseed meal. This we will call "No. 1."

A mixture of one part of cottonseed meal to two parts of high-grade acid phosphate will greatly increase the growing condition and will be better for medium soils. This we will call "No. 2."

Air-slaked lime is of value for use on stiff or gummy soils to loosen them up, permit the air to enter, and prevent a sour condition of such soils when too wet.

On thin or impoverished soils equal quantities of cottonseed meal and acid phosphate can be used to advantage. This is "No. 3."

In case the foregoing can not be obtained, standard-grade commercial fertilizers may be used. These should contain in the mixture eight to ten per cent. of available phosphoric acid, two to three per cent. of nitrogen, and one and one-half to two per cent. of potash, or on some lands a high-grade acid phosphate, fourteen per cent., may be used.

On black, waxy land the best practice is to have the cotton follow a crop of cowpeas.

Where lands are greatly worn by years of cropping, more fertilizer should be used to the acre, and it should contain about equal parts of cottonseed meal and high-grade acid phosphate. The beneficial effect of commercial fertilizers depends largely upon the presence of humus in the soil; hence the importance of using stable manure and plowing under green crops.

In applying the foregoing instructions the farmer must use considerable judgment and modify his practice where necessary to fit local conditions.

Raise Your Own Meat.

Years ago I wrote of visiting a man's farm, where all the land was in cotton right up to the house standing unpainted in a bare field. A hopeless looking woman was frying some Western bacon for the dinner, while the man toiled in the cotton. And I got to thinking over the matter. There was no stock on the place but the mules that worked the cotton. And as I saw that bacon I thought that some farmer out West raised that hog, and probably made something out of it. Some railroad carried it to Chicago, and certainly made money. Some packer bought and cured the meat, and grew to be a millionaire. Another railroad brought it South and paid dividends by doing it. Some merchant bought it, and sold it to that man out there in the cotton field at a big profit—and he works all summer in the cotton making all these people prosperous out of his one crop, while at the end of the year he is as poor as ever, and his land grows less and less productive, while he might have made all those profits himself in raising the bacon at home.

The Western farmer makes corn, the railroads haul it, the merchant buys it and sells it to the man who could raise the corn at more profit than the Western farmer if he improved his land. Yet he goes on in the old hopeless way, imagining that cotton is the only thing to get money out of, and that corn, oats and wheat are only "supplies," and the Western farmer gets rich supplying him.

Here and There.

The man who makes the proposition should be studied as closely as the proposition itself.

Your mistake often is as big as the other fellow's—but the other fellow's looks worse.

Women spend most of the money, otherwise there would not be enough to do business with.

It takes a wise man to teach another to do right, but a fool can show him how to do wrong.

There are those who, if they owned the world, would still have that which they could not operate.

It may be all right to be strenuous if some one else will stand the expense and let you reap the profits.

We are strong in the muscles we use, and it is so with every faculty of the soul, and every attribute of the mind.

A good tonic: Halve your food, double your drinking water, trouble your consumption of pure air, and quadruple your laughter.

When will the cotton farmer get out of this slavery to everybody else? Not till he goes to farming just as the Northern and Western farmers do. He has a crop that is far superior as a money crop to any they have, and a crop that fits into an improving rotation of crops fully as well as any they have North or West, and while they get rich in sending him "supplies" he gets poor furnishing the crop that maintains the trade balance between this country and Europe, and selling the cottonseed that fattens the cattle that make the meat he buys in various forms.

Now, then, is the time to resolve to change all this. Plan a rotation for your farm and stick to it, grow plenty of forage and make manure, and when you once have manure enough to cover a cornfield you will be on the road out of this slavery to the North and West.

Nine-tenths of the letters I get from farmers ask what fertilizer I shall use for this, that or the other crop, when the man who farms right will need to buy little, and that only of the mineral forms of acid phosphate and potash, or but one of these, perhaps.

I have been hammering away at this for many years, and yet how few have taken the idea. But I do hear now and then from farmers who have broken loose from the old ruts, and are succeeding. Would to God that I could get all of them to do so! Professor Massey, in Progressive Farmer.

Protein in a Ration For Cows.

J. H. R. Schell, W. Va., writes: I am feeding milk cows equal parts of cornmeal and bran. Would an addition of cottonseed meal be beneficial? How should it be fed in proportion to the cornmeal and bran? Is there any danger attending the feeding of cottonseed meal?

Answer by Professor Soule: Your grain ration would be improved by making it equal parts of cornmeal, bran and cottonseed meal. Presuming that you are feeding as much as ten to twelve pounds of grain a day to a cow weighing 800 to 1000 pounds the mixture might consist of four pounds of cornmeal, three pounds of wheat bran and three pounds of cottonseed meal. We have a ration of two-thirds cornmeal and cottonseed meal to cows with very good results, particularly where we were maintaining them on silage and feeding some leucorrhoea has derived from clover, alfalfa or cowpeas. Cottonseed meal can easily be fed to cows without any danger whatever if rationally used. You should remember, however, that a pound of cottonseed meal contains more than three times as much digestible protein as a pound of wheat bran, and that it is, therefore, a very concentrated foodstuff, and can not be fed carelessly or in too large amounts without a likelihood of deranging the digestive organs of your cows. Those who have fed cottonseed meal and found it unsatisfactory have generally not handled it in an intelligent manner. While three pounds is about the right amount to feed a cow per day, even four or five pounds have been fed for long periods without injury under good management. We would prefer to see the cottonseed meal limited to two or three pounds per head per day, as its great virtue is to supply protein to balance up the corn and other one-sided grain crops produced on the majority of our farms.

A Convenient Portable Fence.

The panels in the portable fence shown here are made of four-inch fencing, fourteen feet long, with six-inch spaces between the boards, thus making a fence three feet high by allowing the cleats to project two inches. The fence is to be used for pigs the lower space may be reduced to four inches and the upper one increased to eight inches. The fence is held in place by triangular frames. The ends of the panel overlap about six inches and fit into notches for the top and bottom boards. The brace should be on the outside of the lot. It may be necessary in some cases to stake the panels at the braces to secure greater stability.

creased to eight inches. The fence is held in place by triangular frames. The ends of the panel overlap about six inches and fit into notches for the top and bottom boards. The brace should be on the outside of the lot. It may be necessary in some cases to stake the panels at the braces to secure greater stability.

Proverbs and Phrases.

He that knows most, grieves most for wasted time.—Dante.

Charm strikes the slight, but merit wins the soul.—Anon.

Look around the habitable world, how few know their own good, or, knowing it, pursue it.—Dryden.

It is curious to see how the space clears around a man of decisive spirit and leaves him room and freedom.—John Foster.

Men who live for self never succeed in satisfying self, or in quite satisfying anybody else; men who live for others in Godlike unselfishness, have joy themselves while giving joy to others.—H. Clay Trumbull.

A good salesman is seven-eighths confidence. He gets that confidence by knowing all about his firm's business and a good deal about the business of the men he sells goods to—only he doesn't tell the buyer about the latter.

How's This?
We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.
P. J. CHENEY & Co., Toledo, O.
We, the undersigned, have known P. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.
WALDRON, KIRKLAND & MARVIN, Wholesale Druggists, Toledo, O.
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

The
Exceptional
Equipment

of the California Fig Syrup Co. and the scientific attainments of its chemists have rendered possible the production of Syrup of Figs and Elixir of Senna, in all of its excellence, by obtaining the pure medicinal principles of plants known to act most beneficially and combining them most skillfully, in the right proportions, with its wholesome and refreshing Syrup of California Figs.

As there is only one genuine Syrup of Figs and Elixir of Senna and as the genuine is manufactured by an original method known to the California Fig Syrup Co. only, it is always necessary to buy the genuine to get its beneficial effects.

A knowledge of the above facts enables one to decline imitations or to return them if, upon viewing the package, the full name of the California Fig Syrup Co. is not found printed on the front thereof.

Sin beginneth pleasantly.—Bible.

Itch cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. At Druggists.

A feast is worth nothing without its conversation.—Irish.

IN AGONY WITH ECZEMA
Whole Body a Mass of Raw, Bleeding, Torturing Humors—Hoped Death Would End Fearful Suffering—In Despair: Cured by Cuticura.

"Words cannot describe the terrible agony I suffered with it broke out on my head and kept spreading until it covered my whole body. I was almost a solid mass of sores from head to foot. I looked more like a piece of raw beef than a human being. The pain and agony I endured seemed more than I could bear. Blood and pus oozed from the great sores on my scalp, from under my finger nails, and nearly all over my body. My ears were so crusted and swollen I was afraid they would break off. Every hair in my head fell out. I could not sit down, for my clothes would stick to the raw and bleeding flesh, making me cry out from the pain. My family doctor did all he could, but I got worse and worse. My condition was awful. I did not think I could live, and wanted death to come and end my frightful sufferings.

"In this condition my mother-in-law begged me to try the Cuticura Remedies. I said I would, but had no hope of recovery. But oh, what blessed relief I experienced after applying Cuticura Ointment. It cooled the bleeding and itching flesh and brought me the first real sleep I had had in weeks. It was as good as a benediction to my tongue. I would bathe with warm water and Cuticura Soap, then apply the Ointment freely. I also took Cuticura Resolvent for the blood. In a short time the sores stopped running, the flesh began to heal, and I knew I was to get well again. Then the hair on my head began to grow, and in a short time I was completely cured. I wish I could tell everybody who has eczema to use Cuticura. Mrs. Wm. Hunt, 135 Thomas St., Newark, N. J., Sept. 28, 1908. Potter Drug & Chem. Corp., Sole Proprietors of Cuticura Remedies, Boston, Mass.

A drop of fortune is worth a cascade of wisdom.—Latin.

An Extreme Case of Eczema Cured.
Winston-Salem, N. C., July 13, 1908. Mr. J. T. Shumrine, Savannah, Ga.

"I was afflicted with Eczema for many years. I had tried every remedy, but nothing gave me greater pleasure than when I am singing the praises of Cuticura. I consulted a physician and he offered me the suffering cure. Some years ago I was afflicted with Eczema. Rural Telephones
Do you realize that rural telephones, more than anything else, tend to increase the earning power of every farm and farmer? Do you realize that ALL of the material needed to build the very best rural telephone line—exactly the same as the Bell Company puts up—will cost you and your neighbors less than half a bale of cotton or twenty bushels of wheat each?

Over 4,000,000 Western Electric Telephones

are in use in the United States to-day. We made the first telephones and we have made the most—in fact, we have made more than all other manufacturers combined.

We have brought the rural telephone within the reach of every farmer, and with our Free Bulletins before him a boy can install and operate the system. Our telephones are guaranteed.

Cut out this advertisement, write your name and address on the margin and mail it to-day so that the Free Bulletins, which describe the entire plan in detail, may be sent you immediately.

WESTERN ELECTRIC COMPANY
Manufacturers and Suppliers of all Apparatus and Equipment used in the Construction, Operation and Maintenance of Telephone Plants.
SOUTHERN OFFICES: Atlanta, Cincinnati, Dallas, Indianapolis, Kansas City, Portsmouth, St. Louis, Savannah.
NORTHERN AND WESTERN OFFICES: Boston, Chicago, Denver, Los Angeles, New York, Omaha, Philadelphia, Pittsburgh, St. Paul, Salt Lake City, San Francisco, Seattle.

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One 10c package colors all fibers. Try dye in cold water before using any other dye. You can dye any garment without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. MONROE DRUG CO., Quincy, Illinois.

Making Good (?)
A bashful dentist upon being presented to a fashionable, but could think of nothing to say. At length the situation became decidedly embarrassing, and, swallowing the lump in his throat with a desperate gulp, he ventured timidly: "Miss Smith, I hope I may consider that we are not entirely unacquainted—I pulled a tooth for your father last Monday." The bud faded away, and the dentist is still wondering why his fraternity friends made him settle for "four rounds."—Bohemian Magazine for February.

Don't leave your stock thrown around "any old way." It may look as though you had been busy, but you lose the benefits of "first impressions."

AFTER FOUR YEARS OF MISERY

Cured by Lydia E. Pinkham's Vegetable Compound
Baltimore, Md.—"For four years my life was a misery to me. I suffered from irregularities, terrible dragging sensations, extreme nervousness, and that all other feeling in my stomach. I had given up hope of ever being well when I began to take Lydia E. Pinkham's Vegetable Compound. Then I felt as though a new life had been given me, and I am recommending it to all my friends."—Mrs. W. S. Ford, 1935 Lansdowne St., Baltimore, Md.

The most successful remedy in this country for the cure of all forms of female complaints is Lydia E. Pinkham's Vegetable Compound. It has stood the test of years and to-day is more widely and successfully used than any other female remedy. It has cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, and nervous prostration, after all other means had failed.

If you are suffering from any of these ailments, don't give up hope until you have given Lydia E. Pinkham's Vegetable Compound a trial.

If you would like special advice write to Mrs. Pinkham, Lynn, Mass., for it. She has guided thousands to health, free of charge.

WILLIAMS' WIZARD OIL

THE OIL THAT PENETRATES
